Coding & Software Training for Colleges

Date: Feb, 24, 2026

At SERT IST, we empower learners with cutting-edge skills in Software Engineering, Artificial Intelligence, Robotics, Mechanical Engineering, Physics, and STEM disciplines. We are pleased to offer free programming training for college students up to 12th grade, aimed at building strong coding foundations, logical thinking, and problem-solving skills. Students may opt for an official SERT IST certificate upon completion, for a nominal fee.

Objectives

- Introduce students to programming concepts in a practical way.
- Develop problem-solving and computational thinking skills.
- Provide hands-on experience with coding projects.
- Encourage students to explore careers in software, AI, robotics, and STEM.
- Offer optional certification to validate skills and enhance resumes.

Eligibility

- College students from grade 6 to 12.
- Students with little or no prior programming experience.
- Students interested in software, AI, robotics, or STEM fields.

Training Program Details

Duration: 4–12 weeks (flexible)
Mode: Online / Offline / Hybrid
Batch Size: 20–50 students per batch

- Introduction to Programming Concepts – Variables, Loops, Conditions
- Problem Solving & Logical Thinking – Puzzles, Algorithm Basics
- Hands-On Programming – Python / Java / C++ fundamentals
- Data Structures & Simple Algorithms – Arrays, Lists, Sorting
- Mini Projects – Games, calculators, basic apps
- Introduction to AI & Robotics – Optional advanced session
- Assessment & Optional Certification – Students may pay a nominal fee for official certification

Training Methodology

- Interactive Lectures – Clear, engaging explanations
- Hands-On Coding – Practice after every session
- Mini Projects – Applying concepts to real problems
- Mentorship – Guidance from experienced instructors
- Evaluation – Optional certification based on projects and assessment

Benefits

- Students gain free, high-quality programming training
- Enhances students' technical and problem-solving skills
- Promotes the college's STEM initiatives and modern learning
- Students may obtain a SERT IST certificate to boost resumes

Resource Requirements

- Computer lab / classroom (for offline mode)
- Internet connection (for online/hybrid sessions)
- Projector / screen (optional)
- Support from college coordinators for scheduling

Certification & Fee

Training is completely free for all students. Students may opt for a SERT IST certificate upon successful completion for a nominal fee. Certification is issued by SERT IST.

SERT IST is committed to providing free, hands-on programming training that empowers students to develop technical skills for future careers in AI, software, and robotics. We look forward to partnering with your college to ignite interest in STEM and technology among students.
